

# PBCore Export - Program Information Screen

From the **Program Information** Screen:

When using the Program Information screen to access the data - users have the option to export information about an *individual program* or the *entire series*

- Program Offers
- Program Search Menu ▶
- Scheduling Grids ▶
- Entity Maintenance
- Air Date Maintenance ▶
- Feed Date Maintenance ▶
- View PBS Feed Schedule
- Program Reports ▶

Access the Program Information Screen from either the drop down menu or the Launch Pad

In this example – generic program query for NOVA

**PBCore Export**

Export the current program offer of the program offers in the queue

[Click here to export the entire series](#)

Files are saved to a local drive with a naming convention of NOLA\_episode#\_program type (HDBA, SDBA, HDUE43 etc.)

When exporting the entire series – ProTrack will create a zip file containing the metadata for every episode in the series (this may take a few minutes depending on the number of programs in the series)

> This PC > Desktop > PBCore
